

SAFETY VACUUM RELEASE SYSTEMS VGBA2008

TP-001 STINGL 2-PUMP ADAPTER BOX

APPLICATION

TP-001 is designed to adapt an SR-500PS to operate and protect a 2-pump spa system equipped with a continuous duty filter pump and a user-requested jet/booster pump that share a common suction line.

HOW IT WORKS

Under ordinary circumstances, starting the jet pump on the same suction line used by the filter pump creates a spike in vacuum that perfectly simulates an entrapment condition. The TP-001 adapter uses a series of relays to communicate with SR-500PS for seamless operation and vacuum protection for both pumps.

TS-001 STINGL 2-SPEED PUMP ADAPTER BOX

APPLICATION

TS-001 is designed to adapt an SR-500PS to operate and protect a 2-speed pump.

HOW IT WORKS

Under ordinary circumstances, the change of motor RPM creates a spike in vacuum that perfectly simulates an entrapment condition. The TS-001 adapter uses a relay system to communicate with SR-500PS when the pump switches speeds for continuous operation.

SR-HH STINGL HOSE & HARDWARE KIT

Standard 8 foot air lock Hose and assorted hardware designed specifically for Stingl SVRS models, SR-500 and SR-500PS.

CATALOG NO.	UPC CODE	DESCRIPTION
TP-001	95427	Two Pump Adapter Box for SR-500PS
TS-001	95428	Two Speed Adapter Box for SR-500PS
SR-HH	95442	Hose & Hardware Kit for SR-500 and SR-500PS
